Our swiss quality SmartHelio© Products:

HelioLearn©	HelioHealth©	HelioApp©

Training platform on PV technologies

IoT monitoring sensor for energy assets

Mobile application allows you to

Comprehensive: covers from technical to business topics
Learner-centric: unique pedagogy
Interactive: fun and easy to follow
Multilingual
Trainees performance tracking

Universal: can be used with any installation (Plug-and-play)
Smart: communicate with HelioApp© (Cloud-based)
Flexible: can be used with PAYGO systems
Reliable: operates on SMS and/or GPRS network

Check the status of your energy assets
Receive mobile alerts from HelioHealth© when a fault occurs on the field
Assign the required intervention to staff for troubleshooting
Predict faults

How can your company use HelioLearn© platform?

Do you struggle in hiring highly skilled employees? Use *HelioLearn©* as a hiring tool and ask your candidates to complete the online modules before inviting them for an interview!

Do you think that trainings are time consuming and expensive? Deliver the theoretical knowledge through our online blended learning formula: People with low tech background will be able to follow the modules due to our unique pedagogy.

Would you like to train your employees on something new? Select the modules that are the most relevant to you on our training platform!

Would you like to track the learning process of your employees? Now, with *HelioLearn©* you can easily keep track of their progresses.

Are your customers willing to understand more about the solar technologies they are using? Provide them with our interactive learning platform and give them the possibility to discover the photovoltaic technology!

How can your company use HelioHealth© and HelioApp©?

Do you think that Operation & Maintenance are among the most critical aspects for PV technologies in rural areas?
We also believe so! For this reason we have developed a simple tool for an efficient troubleshooting process!

Would you like your staff to quickly intervene when a fault occurs on the field?
According to the data sent by the sensor, HelioApp© will notify you whenever a fault on the field occurs so that you can immediately ask your staff to intervene.

Are your customers willing to follow the performance of the solar technologies they are using?
Provide them with HelioHealth© on their module and HelioApp© on their smartphone!
